

## Positioner CMSX

FESTO

## Key features

### Function and application

The CMSX is a digital electropneumatic positioner that enables simple and efficient control of the position of process valves actuated by pneumatic actuators. This robust and compact positioner can be mounted on actuators using a mechanical interface in accordance with VDE/VDI 3845-1 (IEC 60534-6-2). There are product variants for single or double-acting actuators, different flow rates and safety settings (fail-safe, fail in place).

In addition, there are product variants for connecting external displacement/angular sensors to remotely control the position of process valves. Commissioning is simple and robust thanks to an automated initialisation function. For setpoint specification 0/4 ... 20 mA current signals or 0 ... 10 V voltage signal are used, and for analogue position feedback a 4 ... 20 mA current signal is used. The device status is indicated by a digital

alarm output. In addition, a configurable digital input for travel to specific positions and two configurable digital outputs provide feedback on the position limit values. Several freely configurable software functions make the CMSX a flexible solution for any task.

### Innovative

- Sturdy, highly dynamic solenoid valve technology
- No internal air consumption in the controlled state
- Straightforward commissioning thanks to automated initialisation function
- Simple and self-explanatory menu navigation

### Versatile

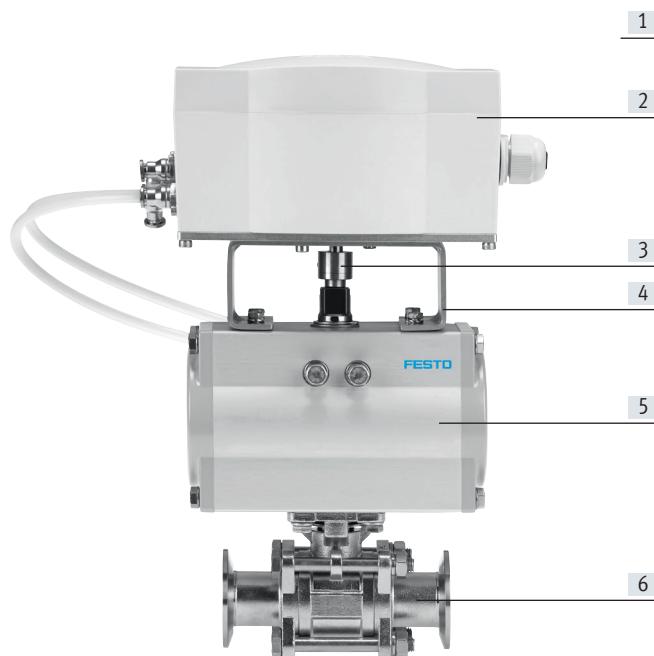

- For single- or double-acting actuators
- Fail-safe or fail-in-place safety function
- Direct connection to quarter turn actuators as per VDE/VDI 3845-1 (IEC 60534-6-2) or remote connection with external displacement encoder

### Design

- 4-conductor technology
- Operating voltage 24 V DC
- Setpoint input 0/4 ... 20 mA, 0 ... 10 V
- Position feedback 4 ... 20 mA
- 1 digital input
- 2 digital outputs
- 1 digital alarm output for feedback of the device status
- Compact polymer housing
- Standard nominal flow rate 50 l/min or 130 l/min
- Housing degree of protection IP65

## Key features

### System structure

- [1] Higher-level system (PLC/IPC or external setpoint generator)
- [2] Positioner CMSX
- [3] Mechanical coupling
- [4] Mounting adapter DARQ
- [5] Quarter turn actuator (example: DFPD)
- [6] Process valve (example: VZBD)

### Positioner/actuator combinations<sup>1)</sup>

CMSX-...	Quarter turn actuator		Linear actuator
	DFPD	DAPS	DFPI
Flow rate	Piston Ø	Piston Ø	Piston Ø
...-50-...	≥ 160	≥ 180	–
...-130-...	≥ 240	≥ 240	≥ 100

1) Precise selection of the positioner for the actuator is dependent on the specific application. Please consult your local Festo contact.
