Round cylinders DSNU

★	Festo Core Range Solves the majority of your automation tasks	With the Festo Core Range, we have selected the most important products and functions from our broad product catalogue, and added the quickest delivery.
Worldwide:	Quickest delivery – wherever, whenever	The Core Range offers you the best value for your automation tasks.
Simply good:	Expected high Festo quality	
Fast:	Easy and fast to select	

Just look for the star!

Key features

At a glance

DSNU-8 ... 63

- Stainless steel piston rod
- Good running performance and long service life
- Piston rod with male and female thread
- Extensive range of accessories makes it possible to install the cylinder virtually anywhere

DSNU-8 ... 25

- The basic versions conform to ISO 6432, variants are based on these standards

Wide choice of variants

DSNU

- Piston Ø 8 ... 63 mm
- Cylinder barrel made of stainless steel
- Bearing and end caps made of wrought aluminium alloy

DSNU-...-MA

- Piston Ø 8 ... 63 mm
- Cylinder barrel made of stainless steel
- Bearing cap with threaded flange
- Short end cap with axial supply port

DSNU-...-MQ

- Piston Ø 8 ... 63 mm
- Cylinder barrel made of stainless steel
- Bearing cap with threaded flange
- Short end cap with lateral supply port

DSNU-...-MH

- Piston Ø 8 ... 63 mm
- Cylinder barrel made of stainless steel
- Direct mounting on bearing cap
- Short end cap with lateral supply port

DSNU-...-KP

- Piston Ø 8 ... 63 mm
- Cylinder barrel made of stainless steel
- With clamping unit

DSNU-...-Q

- Piston Ø 12 ... 63 mm
- Cylinder barrel made of stainless steel
- With square piston rod

Cushioning types

	Cushioning P	Cushioning PPS	Cushioning PPV
Mode of operation	• The drive has elastic polymer flexible end-position cushioning	• The drive has self-adjusting end-position cushioning	• The drive has adjustable end-position cushioning
Application	• Small loads • Low speeds • Low impact energies	• Small to medium loads • Low to medium speeds • Medium impact energies	• Medium to high loads • High speeds • High impact energies
Advantages	• No adjustment required • Saves time	• No adjustment required • Saves time • Powerful	• Very powerful

Key features

Other variants

Symbol	Key features		Description
	S2	Through piston rod	For working at both ends with the same force in the forward and return stroke, for attaching external stops
	S6	Heat-resistant seals	Temperature resistance up to max. 120°C
	S10	Constant motion at low piston speeds	Suitable for very slow and constant (slow speed) and stick-slip-free movements. With very low break-away pressure compared with standard (low friction).
	S11	Low friction	Especially suitable for slow movements with considerably reduced system friction. With very low break-away pressure compared with standard.
	K2	Extended male piston rod thread	–
	K3	Female piston rod thread	–
	K5	Custom piston rod thread	Metric standard thread to ISO
	K6	Shortened male piston rod thread	–
	K8	Extended piston rod	–
	R3	High corrosion protection	All external cylinder surfaces comply with corrosion resistance class CRC 3 to Festo standard 940070. The piston rod is made from corrosion- and acid-resistant steel
	R8	Dust protection (wiper seal) (32 ... 63 mm)	The cylinder has a hard-chrome-plated piston rod and a hard wiper seal, which protects against dry, dusty media
	A6	Metal scraper (32 ... 63 mm)	The cylinder has a hard-chrome-plated piston rod and a metal scraper that scrapes off hard particles (e.g. welding spatter) that stick to the piston rod. For use in welding systems, for example

Longer service life with bellows kit DADB

The bellows protects the piston rod, the seal and the bearing from the effects of a wide range of media, which has a positive impact on the service life of these components.

The bellows kit is a leak-free system. To prevent unwanted media from being drawn in, the supply and exhaust air for the kit must be ducted via a pressure compensation hole in the connection part [1].
The kit protects the piston rod, seal and bearing against a wide variety of media, for example:

- Dust
- Chippings
- Oil
- Grease
- Fuel

Note

1) Cannot be used on the bearing cap in combination with bellows kit DADB.

2) The bellows kit protects the cylinder (piston rod, seal and bearings) against a wide range of media and thus prevents premature wear. It can only be used in combination with an extended piston rod (K8)

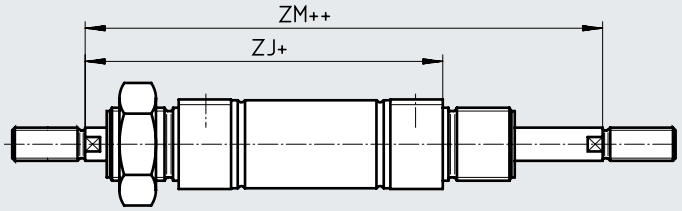
S2 – Through piston rod



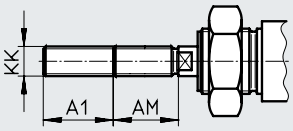
Note

The thread types at both piston rod ends are identical. In combination with variant Q, the left piston rod end is square, the right piston rod end round.

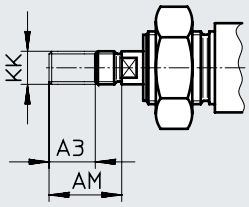
\+ = plus stroke length

++ = plus 2x stroke length

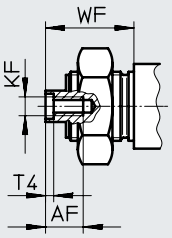
K2 – Extended male piston rod thread



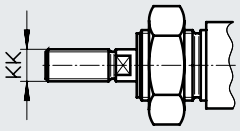
K6 – Shortened male piston rod thread



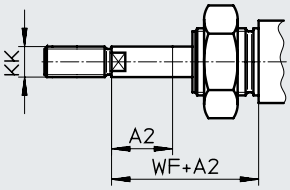
K3 – Female piston rod thread



K5 – Custom piston rod thread



K8 – Extended piston rod



Note

If variant K8 is required in combination with S2, the piston rod will only be extended at one end.

1) Cylinders with position sensing require a minimum stroke of 10 mm to ensure reliable sensing.
Longer strokes on request

Data sheet

Operating and environmental conditions		
Operating medium		Compressed air to ISO 8573-1:2010 [7:4:4]
Note on the operating/ pilot medium		Lubricated operation possible (in which case lubricated operation will always be required)
Operating pressure	[bar]	3 ... 10
Ambient temperature	[°C]	–10 ... +80
Corrosion resistance class CRC[2]		
DSNU-...		2
DSNU...-R3		3

1) Note operating range of proximity switches

2) Corrosion resistance class CRC 2 to Festo standard FN 940070
Moderate corrosion stress. Indoor applications in which condensation can occur. External visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment.
Corrosion resistance class CRC 3 to Festo standard FN 940070
High corrosion stress. Outdoor exposure under moderate corrosive conditions. Externally visible parts with primarily functional surface requirements which are in direct contact with a normal industrial environment.

Forces [N] and impact energy [J]

DSNU-8 ... 25
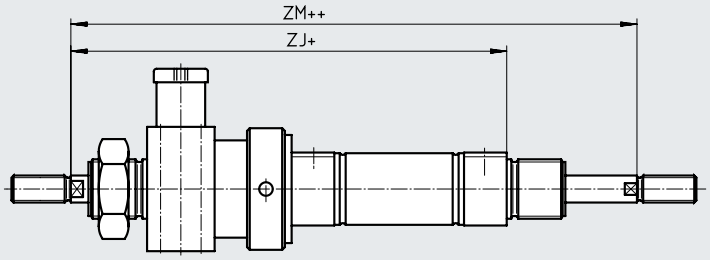
S2 – Through piston rod



\+ = plus stroke length
++ = plus 2x stroke length

Note

The thread types at both piston rod ends are identical. The clamping unit is mounted at only one end.

In combination with variant Q (➔ page 46) the right piston rod is square, the left piston rod round. The clamping unit is mounted on the left-hand, round piston rod.

In combination with variant K8, the piston rod is only extended at the right piston rod. The clamping unit is mounted on the left piston rod that is not extended.

In combination with variant K8 and Q, the piston rod is only extended at the right, square piston rod.

1) Corrosion resistance class CRC 1 to Festo standard FN 940070
Low corrosion stress. Dry indoor application or transport and storage protection. Also applies to parts behind covers, in the non-visible interior area, and parts which are covered in the application (e.g. drive trunnions).
2) Corrosion resistance class CRC 4 to Festo standard FN 940070
Particularly high corrosion stress. Outdoor exposure under extreme corrosive conditions. Parts exposed to aggressive media, e.g. in the chemical or food industries. Such applications may need to be safeguarded by means of special testing (→ also FN 940082), using appropriate media.

1) Corrosion resistance class CRC 1 to Festo standard FN 940070
Low corrosion stress. Dry indoor application or transport and storage protection. Also applies to parts behind covers, in the non-visible interior area, and parts which are covered in the application (e.g. drive trunnions).
Corrosion resistance class CRC 4 to Festo standard FN 940070
Particularly high corrosion stress. Outdoor exposure under extreme corrosive conditions. Parts exposed to aggressive media, e.g. in the chemical or food industries. Such applications may need to be safeguarded by means of special testing (→ also FN 940082), using appropriate media.

Accessories

Flange mounting FBN/CRFBN

Material:
FBN: Galvanised steel
CRFBN: High-alloy stainless steel
Free of copper and PTFE

Accessories

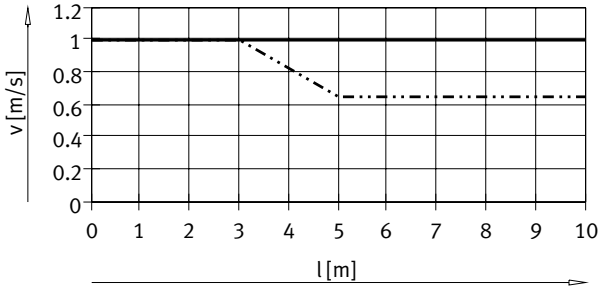
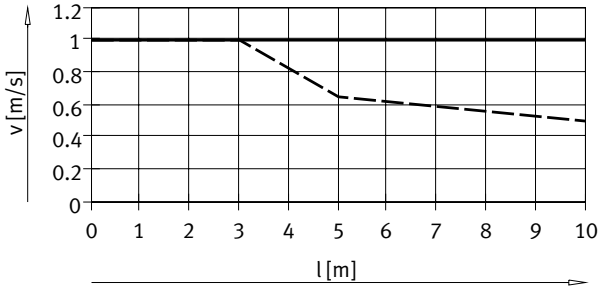
Travel speed v as a function of tubing length l

The bellows kit is a leak-free system.
To prevent unwanted media from being drawn in, the supply and exhaust air must be ducted via a pressure compensation hole in the connection part.
The pressure generated in the bellows kit by the positioning motion is primarily defined by the travel speed and tubing length. The recommended tubing length based on the travel speed of the drive can be read from the graph.

Advancing

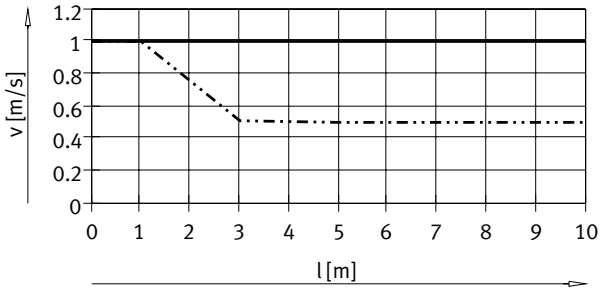


DSNU-12/16
DSNU-20/25

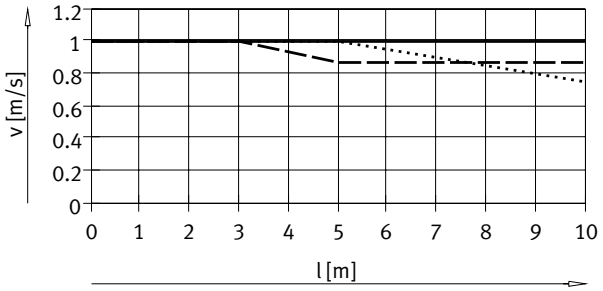


DSNU-32/50/63
DSNU-40

Retracting



DSNU-12/16
DSNU-20/25



DSNU-32
DSNU-40
DSNU-50/63

- Note

The push-in fittings in the adjacent table must be used for the pressure compensation hole.
Silencers can be used as an alternative. This reduces the travel speed slightly.

1) The dimension corresponds to the K8 value (extended piston rod) of the drive

Accessories

Ordering data – Bellows kit

An extended piston rod (order code K8) is absolutely essential when using a bellows kit ➔ Ordering data – Modular product system.

The necessary dimension for K8 as a function of piston diameter and cylinder stroke as well as the corresponding bellows kit is indicated in the table below:

Order example:
Selected round cylinder:
DSNU-25-320-PPV-A-MQ-...
The dimension for the corresponding K8 value (see table): 101 mm
Complete order reference for round cylinder:
DSNU-25-320-PPV-A-MQ-...-101K8
The corresponding bellows kit:
DADB-S1-25-S301-350
